ARTEMİS A.Ş. ABOUT US

Production and service activities, since 1997 continued in Gebze Organized Industrial Zone 10 thousand square-meter factory in Artemis, all thanks to Turkey and technical service network spread over 28 countries, with high customer satisfaction performance. The company, which is a leader in the sector of bath washing, produces its entire product range under one roof. Founded with domestic capital and carrying out R -D / UR-GE processes and product designs with Turkish sector professionals, Artemis exports its products to 56 countries in Europe, Middle East, Africa and Asia.

R-D / P-D

The world continues to change the shape of architecture in the direction of the advancing technology and the needs of the age. As the free spirit of architectural designs redounds on the structures, special solutions are needed in the bathrooms. Artemis applies its sectoral engineering experience with the R-D / P-D units under the leadership of Turkish engineers and with the cooperation of international stakeholders in a problem-free and rational way in the projects requiring special solutions.

1997

Artemis embarked on its journey in its 10,000 square-meter factory located in the Gebze Organized Industrial Zone by manufacturing acrylic bathtubs, shower trays, and steam massage systems using 10 molds.

1999

The company made its first export to the European Union with bathtub and shower tray products.

2004

Alongside acrylic products, Artemis introduced Shower Cabin designs, embracing the use of Tempered Glass and offering options such as patterned and sandblasted glass.

2006

Maintaining its dedication to product development and design, Artemis started manufacturing Free Standing bathtub models.

1998

Taking a significant step, Artemis became the first and only company in the sector to possess a Quality Certificate. Establishing an R&D and Design Unit with a focus on developing acrylic products, it began efforts to diversify molds for shower trays and bathtubs. This initiative led to swift brand recognition and paved the way for exports to neighboring countries.

2001

Production of Shower Cabins commenced, and Artemis formed a second R&D and Design Unit consisting of Turkish engineers to begin enhancing and designing Shower Cabin products.

2005

In collaboration with the ABIGEM (European Union Business Development Center), Artemis partnered with the Sabanci University's Industrial Engineering Department to bring acrylic bathtub modeling projects to life.

2007

Celebrating its 10th anniversary, Artemis expanded its presence not only across Turkey but also globally. It increased the number of countries it conducted exports to, reaching a total of ten countries in Europe and the Middle East.

2008

Continuing to innovate, Artemis introduced Spa products suitable for both indoor and outdoor spaces. It embedded the philosophy "Life begins with water" throughout its product range, highlighting the healing and restorative power of water.

2013

Artemis introduced colored profiles and glass applications for the Shower Cabin product line, achieving coherence between bathroom accessories and washing area product groups.

2017

Celebrating its 20th anniversary, Artemis further solidified its leadership in the sector. By increasing product and size diversity, it introduced the Shower Channels product group to the market.

2021

Continuing its leadership in the bathroom product group with local capital, Artemis set a new trend with hydro massage bathtubs equipped with Bluetooth sound systems.

2010

With the aim of enhancing harmony in bathroom areas, Artemis began production of cuttable shower trays.

2014

Bringing innovations to bathroom spaces, Artemis introduced the Solid product line, which stood out not only for its aesthetic appeal but also for its durability.

2018

Pushing boundaries in bathroom innovations, Artemis introduced Solid Lavabo products to customers and the sector.

2023

Continuously expanding its product range and production capacity, Artemis accelerated R&D and Innovation Unit efforts. It began mass production of Shower Cabin product accessories using CNC Routers and Metal Processing machines, continuing to shape the industry.

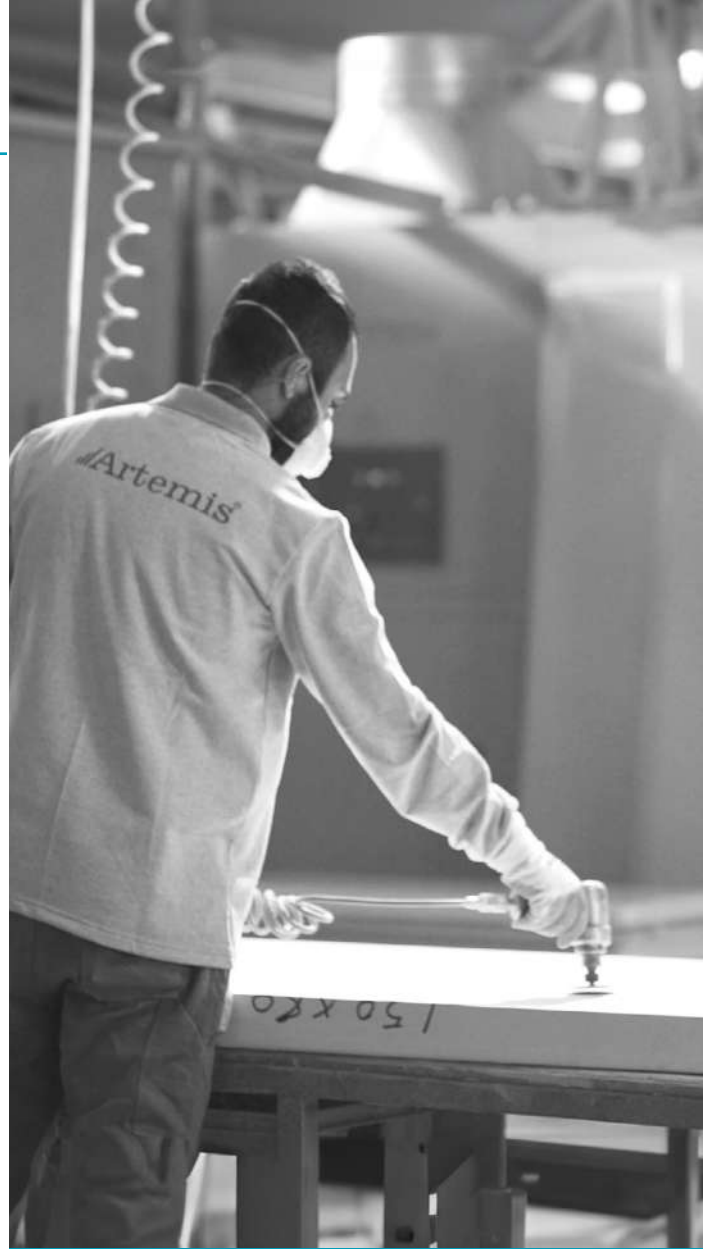

MANUFACTURING

Artemis Bath, on its journey that began with acrylic bathtubs and shower trays, is steadily progressing towards becoming a leader in bathroom bathing area product categories by expanding its product range day by day. Our significant position in Turkey is achieved through our manufacturing facility located in the Gebze Organized Industrial Zone. This manufacturing facility is considered one of the leading centers in the bathroom bathing area sector in terms of technology, quality, and capacity.

Our production area, with the ability to manufacture the entire product range under one roof, provides us with a significant advantage on the path to industry leadership.

Artemis, while pursuing the mission of producing high-quality products, also aims for top-level customer satisfaction.

Within our 10,000 square meter production facility, which houses an expert team and meets world standards, quality and innovation are prioritized at every stage.

From the design phase to production, and from production to logistics, all steps that form the foundation of manufacturing are supported by current design programs and advanced technologies. With continuously updated production facility equipment, Artemis products can be confidently used all around the world.

Using 100% Acrylic Sheets

Artemis bathtubs and shower trays are made from cast acrylic material from the Asterite International brand, which has proven durability with international certifications. This material choice contributes to ensuring high hygiene standards for the products.

Durability Test

The quality and durability of our products have been proven through comprehensive testing conducted by TÜBİTAK. In particular, a 10-year aging test is applied to demonstrate the long-lasting performance of the acrylic sheets used in the products. This test serves to validate the products' resistance to wear, tear, and color fading. Conducted in accordance with TÜBİTAK's quality standards, these tests ensure that Artemis products maintain their durability and aesthetic appearance for many years. To ensure the highest level of durability, these tests are continuously repeated.

10 Year Spare Parts Supply Warranty

Artemis Acrylic product group is committed to maintaining the highest level of customer satisfaction. In line with this commitment, we are extremely meticulous when it comes to spare parts supply. By offering a 10-year guarantee for spare parts supply, we ensure that our customers can use their products smoothly for many years. Timely replacement of spare parts for the acrylic product group not only enhances product performance but is also crucial for long-term use. We promptly fulfill spare parts requests to guarantee the safe and reliable operation of your products.

Weight Test

Bathtubs and shower trays meet high standards in terms of sturdiness and durability. The products undergo testing with support from a minimum of 6 points and are subjected to a weight test of 150 kg. These tests are conducted to ensure the safe usage and long-lasting performance of the products. Artemis products are an excellent choice in terms of quality and reliability, designed to provide our customers with an exceptional experience.

Success Test in Hydromassage Products

Artemis hydromassage tubs are meticulously tested to ensure superior performance and reliability. The international ITT and Balboa brand pumps used in our whirlpool products are subjected to rigorous tests, including high electrical current testing. These performance tests are conducted to guarantee the durability, safety, and long-term operation of the pumps. The pumps are tested with high electrical currents, such as 1100 V, to ensure they meet the highest performance standards. Artemis whirlpool tubs provide a reliable and impressive whirlpool experience while prioritizing user safety.

Functionality

Artemis offers special drain systems for bathtubs, shower trays, and hydro-massage products, standing out with its top-notch design and quality approach. The developed drains are meticulously designed to ensure seamless use and guarantee long-term performance. Aesthetic details, combined with the elegance and functionality of Artemis products, meet user expectations.

1. PRODUCTION WITH CAST ACRYLIC SHEETS

Artemis Acrylic products are manufactured from cast acrylic sheets of the Asterite® brand produced by Asterite International Ltd. Asterite International Ltd. is the world's largest acrylic monomer manufacturer. Acrylic bathtubs use acrylic sheets with thicknesses of 3.2 mm and 4 mm, depending on size and model. Acrylic, a polymer derived from chemical substances, provides an extremely durable and robust structure below certain temperatures, offering a long-lasting glossy and aesthetic surface. The preference for acrylic in the manufacturing of bathtubs and shower trays is due to its ability to be easily molded and shaped at temperatures between 170-190 °C. Thanks to these features, it can be cleaned easily and, in addition to its functional advantages, adds aesthetic value to bathrooms. Moreover, the proven safety and health suitability of acrylic material in medical fields such as orthopedics, dental fillings, and lenses make it a hygienic and safe product. For these reasons, the choice of acrylic material for your bathrooms is one of the determining factors.

- Lightweight.
- Durable.
- Easily takes shape at different temperatures due to its flexibility.
- Can be restored to its original state (100-1200 degrees) with water sanding and special polish in case of damage.
- Resistant to heat and ultraviolet rays, suitable for outdoor use like gardens and terraces.
- Does not allow the formation of wear.
- Proven to be extremely safe for health, recommended by the Ministry of Health for its hygienic properties.

2. OUTDOOR ACRYLIC USAGE

Our products are categorized into indoor and outdoor use based on the application area. While cast acrylic sheets are used for indoor products, more durable cast acrylic sheets resistant to sunlight, UV rays, wind, and rain are used for outdoor products. When placing an order, it is essential to specify whether it is intended for indoor or outdoor use. Due to their higher durability, outdoor acrylic sheets have a price difference compared to indoor ones, and an additional 50% is required for orders using outdoor acrylic sheets.

3. USE OF ALUMINUM MOLDS

Artemis products are meticulously designed to meet high-quality standards and ensure an excellent appearance. Symmetry aesthetics, achieved through horizontal and vertical dimensional uniformity, plays a crucial role in enhancing the visual appeal of products. Despite the higher cost compared to polyester molds, Artemis ensures the perfect form and symmetry of products by using specially designed aluminum molds.

Artemis bathtubs and shower trays are produced using over 900 aluminum molds and 100% acrylic sheets designed by Artemis R&D/Innovation Units. This wide variety of molds provides customers with alternatives in terms of models and dimensions. Aluminum molds provide superior durability and precision, while acrylic sheets offer a smooth surface, gloss, and an aesthetic appearance.

4. REINFORCEMENT APPLICATION

Fiberglass, Polyester Resin, and Plywood

Artemis products use high-quality 18mm thick dry plywood for reinforcement. Bathtubs are supported by adding plywood frames to all edges, plywood wedges to corners, and a complete plywood base for reinforcement.

Materials used for reinforcement include polyester resin, fiberglass, plywood, and components such as white-colored calcite, all sourced from leading international quality-certified companies in Turkey and Europe. Artemis aims to use the best materials to ensure the quality and durability of its products. Along with the reinforced structures, Artemis products guarantee reliability and long-lasting use.

5. GALVANIZED FOOT SYSTEM

The foot system of bathtubs and shower trays has a unique structure. Depending on size and shape, a frame system consisting of plastic-coated steel, with a diameter of Ø40, resting on the floor at least 5 to 14 points, is used. This foot system has a hot-dip galvanized coating for durability and protection.

The panel system is created by fixing at least two points on both the upper and lower parts to the frame. Thanks to the carefully designed foot and panel systems, Artemis products have a secure and robust structure. The feet aim to place the products stably and ensure optimal balance. The hot-dip galvanized coating enhances durability and provides protection against environmental effects. The panel system securely fastened to the frame supports the strength and durability of the products.

Acrylic Surface Cleaner

It is a specially designed solution for the cleaning of acrylic products. It can be used for cleaning acrylic products such as bathtubs, shower trays, vessel sinks, and countertop sinks. Formulated with high-quality components, this cleaner provides effective cleaning without causing any damage to acrylic surfaces. It helps ensure the longevity and shine of your acrylic products.

Hydromassage Sterilization Solution

It is a specially formulated solution for the cleaning and disinfection of the spiral pipes inside whirlpool baths. Effectively eliminating accumulated dirt, oil, and bacteria within the spiral pipes, it supports a clean water flow in the system. By efficiently removing bacteria and microorganisms, it establishes a hygienic environment. Regular cleaning of whirlpool systems is crucial for maintaining a healthy and safe usage. It preserves the hygiene of your whirlpool bath and contributes to an enjoyable user experience.

Our maintenance products are exclusively available through our authorized service centers.

In order to provide the best service to our customers, the sale of our products will be carried out solely by our authorized services. This ensures that our customers can be confident in the authenticity and reliability of our products. Our authorized service centers prioritize offering quality service by providing our products to customers at the most competitive prices. This underscores our commitment to delivering high-quality service.
