# ARTEMİS A.Ş. ABOUT US

Production and service activities, since 1997 continued in Gebze Organized Industrial Zone 10 thousand square-meter factory in Artemis, all thanks to Turkey and technical service network spread over 28 countries, with high customer satisfaction performance. The company, which is a leader in the sector of bath washing, produces its entire product range under one roof. Founded with domestic capital and carrying out R -D / UR-GE processes and product designs with Turkish sector professionals, Artemis exports its products to 56 countries in Europe, Middle East, Africa and Asia.

# R-D / P-D

The world continues to change the shape of architecture in the direction of the advancing technology and the needs of the age. As the free spirit of architectural designs redounds on the structures, special solutions are needed in the bathrooms. Artemis applies its sectoral engineering experience with the R-D / P-D units under the leadership of Turkish engineers and with the cooperation of international stakeholders in a problem-free and rational way in the projects requiring special solutions.

**1997**

Artemis embarked on its journey in its 10,000 square-meter factory located in the Gebze Organized Industrial Zone by manufacturing acrylic bathtubs, shower trays, and steam massage systems using 10 molds.

**1999**

The company made its first export to the European Union with bathtub and shower tray products.

**2004**

Alongside acrylic products, Artemis introduced Shower Cabin designs, embracing the use of Tempered Glass and offering options such as patterned and sandblasted glass.

**2006**

Maintaining its dedication to product development and design, Artemis started manufacturing Free Standing bathtub models.

**1998**

Taking a significant step, Artemis became the first and only company in the sector to possess a Quality Certificate. Establishing an R&D and Design Unit with a focus on developing acrylic products, it began efforts to diversify molds for shower trays and bathtubs. This initiative led to swift brand recognition and paved the way for exports to neighboring countries.

**2001**

Production of Shower Cabins commenced, and Artemis formed a second R&D and Design Unit consisting of Turkish engineers to begin enhancing and designing Shower Cabin products.

**2005**

In collaboration with the ABIGEM (European Union Business Development Center), Artemis partnered with the Sabanci University's Industrial Engineering Department to bring acrylic bathtub modeling projects to life.

**2007**

Celebrating its 10th anniversary, Artemis expanded its presence not only across Turkey but also globally. It increased the number of countries it conducted exports to, reaching a total of ten countries in Europe and the Middle East.

## 2008

Continuing to innovate, Artemis introduced Spa products suitable for both indoor and outdoor spaces. It embedded the philosophy "Life begins with water" throughout its product range, highlighting the healing and restorative power of water.

## 2013

Artemis introduced Coloured profiles and glass applications for the Shower Cabin product line, achieving coherence between bathroom accessories and washing area product groups.

## 2017

Celebrating its 20th anniversary, Artemis further solidified its leadership in the sector. By increasing product and size diversity, it introduced the Shower Channels product group to the market.

## 2021

Continuing its leadership in the bathroom product group with local capital, Artemis set a new trend with hydro massage bathtubs equipped with Bluetooth sound systems.

## 2010

With the aim of enhancing harmony in bathroom areas, Artemis began production of cuttable shower trays.

## 2014

Bringing innovations to bathroom spaces, Artemis introduced the Solid product line, which stood out not only for its aesthetic appeal but also for its durability.

## 2018

Pushing boundaries in bathroom innovations, Artemis introduced Solid Lavabo products to customers and the sector.

## 2023

Continuously expanding its product range and production capacity, Artemis accelerated R&D and Innovation Unit efforts. It began mass production of Shower Cabin product accessories using CNC Routers and Metal Processing machines, continuing to shape the industry.

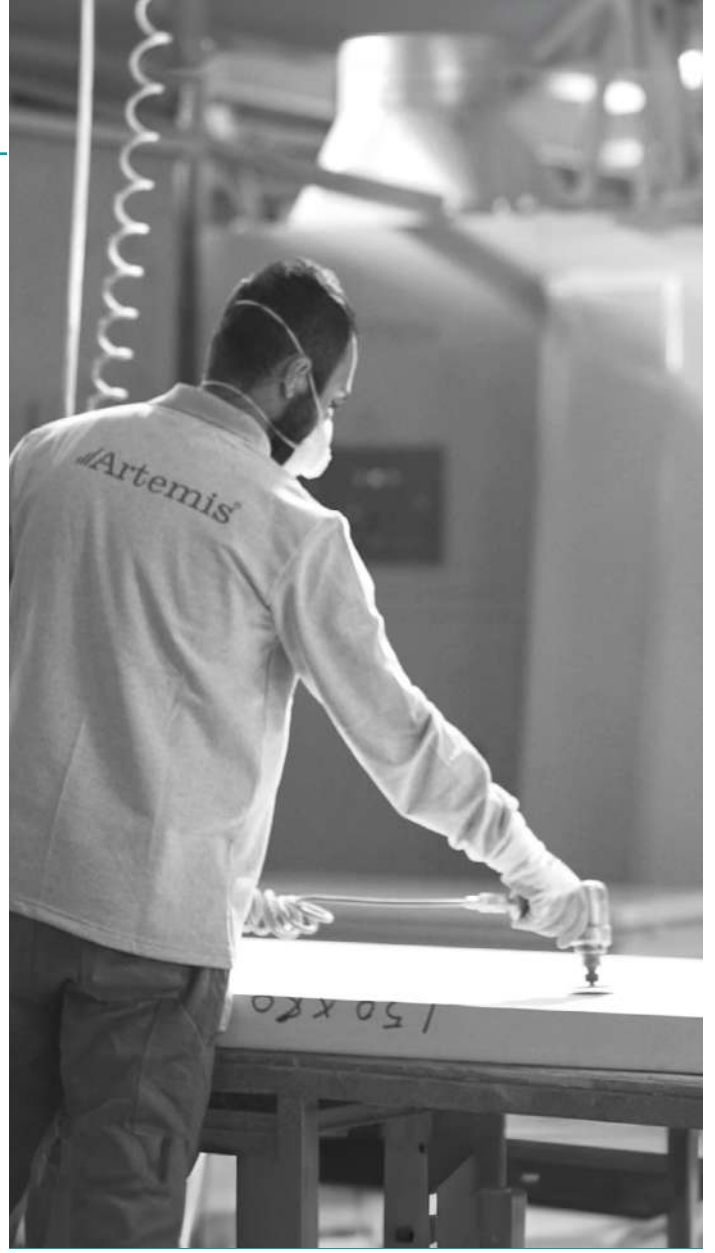

## MANUFACTURING

Artemis Bath, on its journey that began with acrylic bathtubs and shower trays, is steadily progressing towards becoming a leader in bathroom bathing area product categories by expanding its product range day by day. Our significant position in Turkey is achieved through our manufacturing facility located in the Gebze Organized Industrial Zone. This manufacturing facility is considered one of the leading centers in the bathroom bathing area sector in terms of technology, quality, and capacity.

Our production area, with the ability to manufacture the entire product range under one roof, provides us with a significant advantage on the path to industry leadership.

Artemis, while pursuing the mission of producing high-quality products, also aims for top-level customer satisfaction.

Within our 10,000 square meter production facility, which houses an expert team and meets world standards, quality and innovation are prioritized at every stage.

From the design phase to production, and from production to logistics, all steps that form the foundation of manufacturing are supported by current design programs and advanced technologies. With continuously updated production facility equipment, Artemis products can be confidently used all around the world.

### Enhance Your Bathroom Experience with Various Combinations!

Artemis offers a wide range of products to fulfill the requirements of your bathing spaces, providing you with a comprehensive selection. With different models, diverse dimensions, Colours, and pattern options that we offer for shower enclosures, you have the chance to transform the atmosphere of your bathroom areas. Artemis Shower Enclosures, within their extensive product range, provide the freedom to cater to various styles and preferences, offering sliding, hinged, separator, folding, and other door opening combinations. With solutions tailored to every need and preference, Artemis makes sure to elevate your bathroom experience even further.

## Impact Resistance Test at Tempered Glasses

Artemis Shower Enclosures utilize tempered glass to provide their customers with a high-quality and secure shower experience. Tempered glass ensures durability against potential impacts during showering or incorrect handling such as gripping the glass from its center. The tempered glass used in Artemis Shower Enclosures successfully passes tests like the 50 kilogram sandbag test in accordance with TSE standards. These tests are conducted to determine the glass's strength against impact and pressure, and Artemis glass is selected in line with the highest standards to offer our customers maximum safety and resilience.

## Clear Shield Application

The Clear Shield application is a technology specially designed by Artemis Shower Cabins. This application enhances the durability of shower cabin glass and ensures long-lasting use. Additionally, it minimizes the formation of stains caused by hard water and helps the glass stay clean. The Clear Shield application reduces the impact of potentially harmful substances that could affect the glass surface by applying a special protective layer to the glass. As a result, water stains and limescale deposits accumulate less on the glass surface. However, it's important to note that the Clear Shield application is not a 100% limescale prevention technology. It can help prevent the formation of stains caused by hard water, but it cannot completely eliminate them. Therefore, you can enhance the effectiveness of the Clear Shield application by using high-pressure water and a squeegee.

## Tightness Performance Test

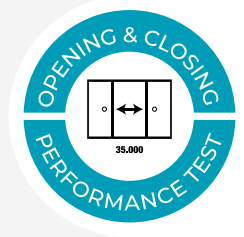

Artemis Shower Enclosures ensure maximum protection during showers by undergoing water leakage tests. The innovative seals used in our products minimize water leaks, providing controlled usage. These seals prevent water from escaping. Combined with hinge and seal design, Artemis Shower Enclosures offer users a controlled shower experience by preventing water leakage.

## Opening / Closing Performance Test

Artemis Shower Enclosures ensure product quality through rigorous inspections such as the door opening/closing test. Shower Enclosures doors undergo a 35,000 cycles of opening and closing test in accordance with TSE standards. During this test, the shower cabin rollers and hinges are also examined to ensure product quality. The stainless steel ball-bearing rollers and hinges used in Artemis Shower Enclosures pass the opening/closing test with exceptional success. This guarantees the product's lifespan, providing our customers with a durable and secure shower experience. The shower cabin doors are continuously tested to demonstrate the durability of our products.

## 10 Years Guaranteed Availability of Spare Parts

Artemis Shower Enclosures consistently aim to maintain the highest level of customer satisfaction. In line with this goal, we are extremely meticulous about spare parts supply. By offering a 10-year spare parts supply guarantee, we ensure that our customers can use their products smoothly for many years. Timely replacement of shower cabin spare parts not only enhances the product's performance but also holds significant importance for long-lasting usage. Artemis Shower Enclosures swiftly fulfill spare part requests, guaranteeing the safe and robust functioning of your products. We are committed to providing our customers with high-quality service and being there for them at all times.

## 85 Pieces Broken Part at Tempered Glass

Artemis Shower Enclosures subject tempered glass to various tests during the production process to ensure their durability. Among these tests is the determination of the number of fragments that may result if the glass breaks. The minimum number of fragments established for 4mm and 6mm tempered glass, which is 85 pieces, guarantees breakage without causing harm to human health. These standards are set to ensure our customers have a safe usage experience. Artemis Shower Enclosures always prioritize the safety and satisfaction of their customers by utilizing high-quality and durable materials.

# Sliding Systems

Sliding shower enclosure systems, which reshape the design of your bathroom and add a modern touch, offer a perfect balance of aesthetics and functionality. These systems not only provide your bathroom with a simple and elegant atmosphere but also optimize space usage, contributing to a spacious and organized appearance.

Specially designed rollers for each model guarantee a smooth and noiseless movement. As a result, when opening and closing the shower enclosure doors, you won't encounter any noise or difficulties. Especially during moments when you need relaxation in the mornings or at the end of the day, it offers a silent and comfortable bathing experience.

Customized handles and rollers for each model make your shower enclosure unique. By harmonizing elegance with functionality, these special details not only reflect the character of your shower enclosure but also ensure ease of use. Unique designs and carefully selected materials make your shower enclosure visually appealing and long-lasting.

Sliding systems, with their wide opening capacities, enable you to utilize your bathroom space more effectively. This welcomes you to a spacious shower experience and makes your daily life more comfortable and organized. With all these features, sliding shower enclosure systems provide a perfect answer to the demands of modern life, offering one of the most effective ways to transform your bathroom into a functional living space.

# Hinged Systems

Hinged shower enclosure systems that reshape your bathroom and add a classic touch seamlessly combine aesthetics with modern living in a perfect balance. These systems not only allow your bathroom to gain an elegant and stylish atmosphere but also provide a practical usage area with their wide opening capacity.

Specially designed hinge systems for each model have a wide opening angle, enabling you to make the best use of your bathroom space. This enhances the functionality of your bathroom and provides a spacious area for movement.

Offering a blend of aesthetics and functionality, these systems enrich your daily bathing experience.

# Walk-In Systems

Designed to maximize the organization and functionality of your bathroom, separator shower enclosure systems offer a unique space-dividing solution. These systems not only allow you to conveniently separate your bathroom and sink area but also bring aesthetics and functionality together.

Customized design details blend aesthetics and functionality, aiding you in personalizing your bathing experience.

Separator systems provide practical installation options, allowing you to easily divide your bathroom area. Equally effective in both functionality and aesthetics, these systems optimize your bathroom's layout while enhancing its style.

Free Standing Bathtub

*Lina*

# Folding Systems

Foldable shower enclosure systems, designed to enhance the efficiency of your bathroom's design, offer a modern and functional solution. These systems allow you to make the most of your small bathroom space while also providing a minimalist design.

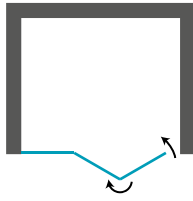

With their foldable doors, you can effectively utilize your bathroom area to the maximum, creating open space and a modern style. These systems offer a wide opening capacity in narrow areas, making it easier to use your bathroom while also providing an attractive aesthetic.

Foldable systems are an excellent choice for transforming your bathroom into a modern living space.

# T Line Series

## Customized Solution Systems

# T Line 110 / Spotted

Our T-Line special solution product features a design comprised of the combination of two cabins. Functionally, it aims to enhance living spaces such as bathrooms or gyms, dressing rooms, etc., making them more convenient. Depending on the use, both sides can be used as a shower cabin or one side as a shower cabin and the other side for needs like sink, toilet, dressing, etc.

The most distinctive feature of our T-Line models is the ability to customize the central junction according to preference. Punto, Hinge, and Profile designs are available. Our T-Line 110 model features the Punto design.

Our T-Line special solution product boasts a functional and user-friendly design, providing a bathroom experience that can adapt to different needs.

### Acrylic Surface Cleaner

It is a specially designed solution for the cleaning of acrylic products. It can be used for cleaning acrylic products such as bathtubs, shower trays, vessel sinks, and countertop sinks. Formulated with high-quality components, this cleaner provides effective cleaning without causing any damage to acrylic surfaces. It helps ensure the longevity and shine of your acrylic products.

### Bathroom Cleaner

It is a solution specially designed for cleaning shower cabin glass. Formulated with high-quality components, this cleaner provides effective cleaning without damaging the glass. We claim it to be more effective than other products used for shower cabin glass. This cleaner helps you maintain the longevity and pristine condition of your shower cabin glass.

Our maintenance products are exclusively available through our authorized service centers.

In order to provide the best service to our customers, the sale of our products will be carried out solely by our authorized services. This ensures that our customers can be confident in the authenticity and reliability of our products. Our authorized service centers prioritize offering quality service by providing our products to customers at the most competitive prices. This underscores our commitment to delivering high-quality service.

- Optional Colour options.
- Smoked, Bronze, Reflective, Mirror Colour glass applications are not available for Oval Solution 330/335 shower cabin models.
- Mocha Colour profile application is not available for Oval Solution 330/335 shower cabin models.
- Only Floor sandblasting glass design is applied for Oval Solution 330/335 shower cabin models.
- Digital printing glass design Colour options are; White, Gray, Black.
- Special pricing is available for reflective glass Colour application.
- Special pricing is applied for Mirror glass application.
- Special pricing is available for ribbed glass applications.
- For information on applicable models and pricing, please contact our Regional Sales Representative.

## 1. ALUMINUM PROFILES

### A. EXTRUDED ALUMINUM PROFILES

Profiles made from AlMgSi 0.5 aluminum alloy, with precise tolerance, conform to the chemical composition of TS EN 573-3 and mechanical properties of TS EN 755-2. These profiles, in the F22 condition, are suitable for drilling, cutting, machining, and bending. Aluminum profiles are obtained by extruding molds of various sections horizontally or vertically through direct or indirect methods at adequate temperatures. Painting of Extruded Aluminum Profiles: Extruded profiles are painted using the electrostatic powder coating technique.

Paint Thickness: 80 - 150 microns.

Powder Coating Technique: Ready profiles are taken from the chromate basket; using a tribo system, profiles are painted with chrome guns that spray 200 grams of powder paint per minute. Paint and air flows are adjusted from the external control unit based on the profile type. Painted profiles are then passed through a curing oven to ensure adhesion and hardening of the paint.

### B. ANODIZED ALUMINUM PROFILES (E6EV1)

Anodizing is a method of covering the surface of extruded profiles with anodic oxidation to protect against corrosion, wear, and electrical conductivity. The anodized coating quality complies with TS 4922.

Anodized Thickness: 10 - 12 microns.

## 2. GLASS

### A. TEMPERED GLASS

The tempering process is accomplished by heating the glass in the furnace up to its softening point and rapidly cooling the glass surface. As a result of the tempering process, the mechanical strength of the glass increases, and in the event of glass breakage, it separates into smaller, non-sharp-edged pieces compared to regular glass. The particle count in 25 cm<sup>2</sup> should be at least 15.6 for glass with a thickness of 4-6 mm and at least 40 for glass with a thickness of at least 15.6 mm, with no glass piece longer than 10 mm between the pieces. The dimensional and mechanical properties of tempered glass at Artemis comply with the EN 12150-2 standard.

A sandbag weighing 45 kg and filled with sand particles ranging from 0.6 to 1.2 mm in size should be tied to a rope with a length of 1.2 mm and dropped at a 30-degree angle. There should be no breakage in the glass.

Note: Shower enclosure glass is not covered under warranty.

## 3. MAGNET

Sliding or movable shower cabin door and side panel glasses are connected to each other by magnetic field plastic materials, ensuring a secure bond and serving the function of waterproofing.

|---------------------|------------------------------------------|-------------------|----------------------|
| Density             | DIN 53479 (3.61 ± 0.3) g/cm <sup>3</sup> | Tensile Strength  | 505 - 200 N/cm ± %10 |
| Hardness (Shore-A)  | DIN 53505 (53 ± 5)                       | Flexural Strength | 23 ± 3               |
| Tear Resistance     | DIN 53504 (3 N/mm <sup>2</sup> )         | Lubrication Test  | +70°C                |
| Elongation at Break | 200 m/min                                | Tear Strength     | 2N/mm <sup>2</sup>   |

## 4. SCREWS

Stainless steel connection elements made of cold-forged stainless steel wire.

Specification: Inox A2 (Stainless steel) 304 CU.

## 5. SEALS

These are plastic materials used for preventing leakage and securing the glass to the panel in shower cabins.

|                     |                              |
|---------------------|------------------------------|
| Tensile Strength    | 1517 N/cm <sup>2</sup> (min) |
| Elongation at Break | %190 (min)                   |
| Hardness Level      | 50 - 80 (Shore -A)           |

## 6. PLASTIC PARTS

Plastic-based materials that facilitate movement, friction, closure, assembly, and fixation in shower cabins.

Friction materials are POM and its derivatives, and stationary materials are ABS-based.

## 7. SILICONE

A polymer suitable for versatile use inside and outside, and the silicone used at Artemis has antibacterial properties.

|                    |                                      |                        |                       |
|--------------------|--------------------------------------|------------------------|-----------------------|

| Density            | 1.00 ± 0.02 gr/cm <sup>3</sup>       | Skin Bonding Time      | Approximately 15 min. |

## 8. HINGE / METAL PARTS

Hinges or metal parts are mostly made of aluminum 5-Z 410 (ZnAl4Cu1) material EN 12844:1998 meets the standards for material content, and EN 12540:200 and DIN EN ISO 9227 meet the standards for metal corrosion resistance.

| CONTENT           | MEASUREMENT            | CONTROL METHOD |
|-------------------|------------------------|----------------|
| Thickness         | g/cm <sup>3</sup>      | DIN 53479      |
