What is Artemis Solid Surface?

It is a smooth, non-porous and homogeneous surface material composed of acrylic and natural minerals.

Solid consists of 65% Aluminum Trihydrate (ATH), 33% Methylmethacrylate Resin (MMA), 2% colorant, and catalyst components. They are manufactured under pressure and heat effect in specially designed moulds. Polyester is certainly not used in it. Thanks to the colorant minerals added into the ingredients, it looks like a natural granite.

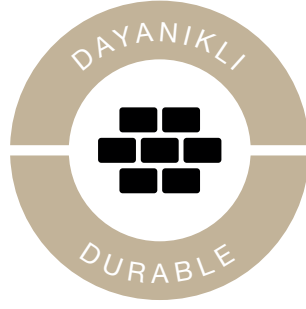

Artemis ® Solid Surface stands out as a durable material in the living spaces in bathroom. With its wide range of use areas and durable structure, Solid Surface, which has been tested for mechanical, thermal, electrical and other surfaces, is the most commonly used material for covering.

A New Line! A New Aesthetic!

Artemis ® Solid Surface with its rich color range and elegance offers you the unlimited lines in your imagination combining with designs. It brings together simple elegance and hygiene for you with these solutions tailored to needs. It gives you a new perspective on the sensitivity and cares that it contains in its details. It defines modern bathrooms with a design that adds a different meaning and touch to the bathing areas!

Solutions That Add Value to Washing Areas

Bathroom products and accessories may seem like small details in our lives, but they transform into "solutions that add value to the bathing areas" when they are designed according to needs and expectations. Bathroom products that combine design and harmony with solutions specific to bathing areas offer you rich and unique options. The only thing you need to do at this point is to choose products for your bathroom bathing areas!

Solid, proves itself with its extreme durability that enables the life make sense. It is used for long life by renewing itself against wear and abrasion which may be formed by using in daily life.

Solid Surface is a non-porous material as of its structure. The content is manufactured as massive and thanks to the special application that brings the adjoining parts together, it prevents the bacteria to reproduce.

It is possible to catch warmth, chic and vitality with Solid Surface colours. It creates integrity in the bathrooms by easily choosing from the color palette.

It makes the surfaces non-slippery by offering solutions to the slippery caused by water and soap over time. Artemis® Solid Surface ensures a safe and comfortable space.

Dreams should not have a limit. Along with not positioning the thoughts that contain feelings and wishes to a point, it takes the dreams out of boundaries.

The solid surface structure can easily absorb heat and can be shaped by heat. It radiates back the heat it absorbed from its surroundings and contributes to the warming of the domain.

With its transparency feature, Solid Surface brings luminosity to its surroundings by passing light through its structure.

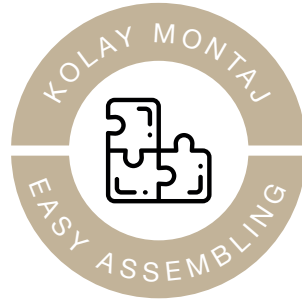

By its form feature and depth given by design, removes the problem of splashing.

Thanks to the homogeneity of the minerals and structure contained in the Solid Surface, it can be recycled by dissolving without giving harmful gas to the environment.

It is environmentally friendly with its production according to the standards, by the minerals it contains and by its homogeneous structure.

Thanks to its innovative and expert technical service, the assembly of Artemis® Solid Surface is quick and easy.

The surfaces designed with Solid Surface, can easily be brought back to an appearance as it is on the first day, with the help of specially produced sandpaper. In the event of unforeseeable damage, on-site repair is provided without the need to change the product completely.
