PERFECT NATURE, PERFECT BEAUTY

Since 1972, Ege Seramik has been transforming the raw beauty of the earth into refined ceramic surfaces — uniting design, technology, and functionality.

ABOUT US

Rooted in the philosophy Perfect Nature, Perfect Beauty, we draw inspiration from nature's timeless textures and translate them into collections that bring elegance and harmony to spaces around the world. From our earliest days, we have embraced innovation not as a trend, but as a tradition — introducing industry firsts in Türkiye's ceramic industry, including the pioneering use of digital printing technology in 2009. As a proud member of İbrahim Polat Holding, Ege Seramik represents Turkish ceramics with distinction both domestically and internationally.

Without the people who live in them, homes, buildings, and towns are merely empty spaces. For more than fifty years, Ege Seramik has designed and crafted ceramic surfaces where practicality meets beauty, tradition blends with innovation, and technology serves human needs. Our advanced technologies, high standards, and reliability are matched by style, taste, and a genuine passion for ceramics — because where design ends, emotion begins. More than a manufacturer, Ege Seramik is a storyteller, bringing the natural elegance of the earth into homes, commercial spaces, and public environments. Guided by innovation, craftsmanship, and sustainability, we continue to shape the future of ceramic design while honoring the traditions that have defined us for over half a century.

Facilities in
Kemalpaşa, İzmir,
produce
23.6 Million m²/ year

Export more than
250 customers in
70+ Countries

All over Türkiye,
2 DIY Stores, 1 Showroom
150+ Retail Stores

Every Ege Seramik collection begins with authenticity and is perfected through precision. From the veined elegance of marble, to the warm character of wood, to the urban textures of concrete, and the intricate detail of mosaics — each design captures the essence of its inspiration, while offering durability and performance that endure for years. Our commitment to quality is reinforced by internationally recognized certifications.

Quality Certificates

Environmental Responsibility

Protecting Nature, Shaping Future

At Ege Seramik, sustainability is at the core of our production and design philosophy. Every tile we create reflects our commitment to the environment.

Ege Seramik is one of the first companies in Türkiye to implement environmentally friendly production facilities, integrating sustainability into every step of its operations, from manufacturing to logistics and sales, maintaining high recycling rates.

Ege Seramik is committed to working towards carbon footprint neutralization and engaging in climate diplomacy in international forums to offer solutions that impact global emissions.

According to the changes in the prints of pattern due to the design of our products, the color tone changes indicated on the labels of the boxes are made as follows. When it is opened 1 box from the product you purchased, changes in the patterns and views between the tiles found in the box are varied with respect to the design of the products.

UNIFORM
APPEARANCE

V1 Uniform Appearance

Color and texture difference between the tiles from the same lot is very low which cannot be seen as a result of the nature of the material.

SLIGHT
VARIATION

V2 Slight Variation

There are clear differences in surface texture and printing patterns among the tiles having similar colors.

MODERATE
VARIATION

V3 Moderate Variation

Main colors in one single tile can be found in other tiles. However color intensity shows differences between tiles. This is generally used in rustic tiles.

SUBSTANTIAL
VARIATION

V4 Substantial Variation

Color differences can be observed from one tile to another. Thus, color of one tile can be different from another one. However, a harmony is observed between colors. These kinds of products can be found in the boxes in a random order. This is a design approach which is generally used in rustic tiles. Color and texture variation can be controlled in our facilities. This is a parameter and it is developed in the stage of product development as a requirement of market demands and design.

Application Techniques

Herringbone Laying

Double Herringbone Laying

Staggered Laying (Max 15% - 20%)

Staggered Laying (Max 50%)

Half Offset Laying is not Recommended
